Megan Edge

Master Healer, Author &
Educator

Past Life Exploration

Past Life Exploration is a dynamic healing modality, used by many health practitioners, both main stream and in alternative medicine traditions. Through the experience of past life regression, you can release negative feelings and physical sensations that are connected to your past lives and which no longer serve you in the present.

You can also connect to past lives where you were successful, loved, and respected. Connecting with positive and successful lifetimes and experiences can remind you of what's possible, helping you welcome these opportunities into your current life in deeper and more conscious ways.

Join Megan Edge, Master Healer, author and educator for an evening of Past Life Exploration. Megan will teach the successful methods she uses with clients and students to help you remember your past lives, learn from, and heal them.

Friday, March 17 @ 7:00pm
Parksville Community Centre
[132 Jensen Ave](#)
